DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Video Summarization - Visual Storyboard using video clips

PROJECT REPORT

Submitted by,

Shivansh Gupta

1RV20CS160

Aisiri M R

1RV20CS012

Mohammad Bilaal

1RV17CS086

Under the guidance of

Dr. Hemavathy R

Associate Professor

Dept. of CSE

RV College of Engineering

In partial fulfillment for the award of degree

of

Bachelor of Engineering

in

Computer Science and Engineering

2023-2024

RV COLLEGE OF ENGINEERING[®], BENGALURU-59

(Autonomous Institution Affiliated to VTU, Belagavi)

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

CERTIFICATE

Certified that the major project work titled '*Video summarization - Visual Storyboard using video clips.*' is carried out by **Shivansh Gupta (1RV20CS160)**, **Aisiri M R (1RV20CS012)**, and **Mohammad Bilaal (1RV17CS086)** who are bonafide students of RV College of Engineering, Bengaluru, in partial fulfillment for the award of degree of **Bachelor of Engineering in Computer Science and Engineering** of the **Visvesvaraya Technological University**, Belagavi during the academic year 2023-2024. It is certified that all corrections/suggestions indicated for the Internal Assessment have been incorporated in the major project report deposited in the departmental library. The major project report has been approved as it satisfies the academic requirements in respect of major project work prescribed by the institution for the said degree.

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

DECLARATION

We, **Shivansh Gupta (1RV20CS160)**, **Aisiri M R (1RV20CS012)**, and **Mohammad Bilaal (1RV17CS086)**, students of eighth semester B.E., department of CSE, RV College of Engineering, Bengaluru, hereby declare that the major project titled '*Video summarization - Visual Storyboard using video clips.*' has been carried out by us and submitted in partial fulfillment for the award of degree of **Bachelor of Engineering in Computer Science and Engineering** during the academic year 2023-24.

Further we declare that the content of the dissertation has not been submitted previously by anybody for the award of any degree or diploma to any other university.

We also declare that any Intellectual Property Rights generated out of this project carried out at RVCE will be the property of RV College of Engineering, Bengaluru and we will be one of the authors of the same.

Place: Bengaluru

2. Aisiri M R (1RV20CS012)
3. Mohammad Bilaal (1RV17CS086)

ACKNOWLEDGEMENT

We are indebted to our guide, **Dr. Hemavathy R**, Associate Professor, **Dept of CSE** for her wholehearted support, suggestions and invaluable advice throughout our project work and also helped in the preparation of this thesis.

We also express our gratitude to our panel members **Dr. Rajashree Shettar**, Professor and Dean (PG Circuit Branches) and **Dr. Shanta Rangaswamy**, Professor, Department of Computer Science and Engineering for their valuable comments and suggestions.

Our sincere thanks to **Dr. Ramakanth Kumar P.**, Professor and Head, Department of Computer Science and Engineering, RVCE for his support and encouragement.

We express sincere gratitude to our beloved Principal, **Dr. K N Subramanya** for his appreciation towards this project work.

We thank all the **teaching staff and technical staff** of the Computer Science and Engineering department, RVCE for their help.

Lastly, we take this opportunity to thank our **family** members and **friends** who provided all the backup support throughout the project work.

ABSTRACT

This project, titled "Video Summarization - Visual Storyboard using Video Clips," addresses the challenges of information overload and time constraints faced by users when consuming video content. Existing systems struggle to maintain accuracy and relevance in summarizing complex videos, often lacking real-time processing capabilities. Our objective is to develop a robust system for generating concise video summaries and visual storyboards, leveraging advanced AI techniques such as deep learning and multimodal analysis.

The methodology encompasses four phases: Research, Planning and Design, Code Development and Execution, and Results and Analysis. We utilized Python for implementing deep learning algorithms, Google Colab for training models, and custom datasets from YouTube for testing. The system's architecture integrates CNNs and RNNs for feature extraction and sequence modeling, alongside attention mechanisms for improved summarization quality. The process includes preprocessing video data, extracting key frames, and generating visual storyboards with contextual relevance.

Experimental results demonstrate that our system effectively summarizes videos with high accuracy and user satisfaction. The robustness of the system is highlighted by its ability to handle large datasets and multiple concurrent users without performance degradation. Specifically, the system processes videos with lengths ranging from 2 minutes to 1 hour, maintaining an average processing time of 3 seconds per minute of video. The system supports up to 500 simultaneous users, ensuring stable and reliable performance. Statistical analyses confirmed the significant differences in processing times between the prompts, validating our approach. The performance metrics, including processing time, standard deviation, and user satisfaction, highlight the system's robustness and reliability.

In conclusion, our project successfully addresses the identified gaps in video summarization and storyboard generation. Future work will focus on optimizing processing times, enhancing story quality, and integrating real-time summarization capabilities. User feedback will be incorporated to refine algorithms, ensuring continuous improvement and adaptability to diverse video content types.

ACRONYMS

1. **GAI:** Generative Artificial Intelligence
2. **LLM:** Large Language Model
3. **CNN:** Convolutional Neural Network
4. **NLP:** Natural Language Processing
5. **API:** Application Programming Interface
6. **RNN:** Recurrent Neural Network
7. **VS Code:** Visual Studio Code

TABLE OF CONTENTS

	Page No.
Abstract	
List of Tables	
List of Figures	
 Chapter 1	
Introduction	12
1.1. State of Art Developments	12
1.2. Motivation	12
1.3. Problem Statement	12
1.4. Objective	13
1.5. Scope	13
1.6. Methodology	13
1.7. Organization of the Report	14
1.8. Summary	14
 Chapter 2	
Overview of Video summarization - Visual Storyboard using video clips	15
2.1. Introduction	15
2.2. Relevant information	15
2.3 Summary	16
 Chapter 3	
Software Requirements Specification of Video summarization - Visual Storyboard using video clips	17
3.1. Overall Description	17
3.2. Specific Requirements	17
3.2.1 Functional Requirements	17

3.2.2. Performance Requirements	18
3.2.3. Software Requirements	18
3.2.4. Hardware Requirements	18
3.2.5. Non-Functional Requirements	18
3.3. Summary	20

Chapter 4

High Level Design of Video summarization - Visual Storyboard using video clips

4.1. Design Considerations	21
4.2. System Architecture	21
4.3. Data Flow Diagram	22
4.3.1. Data Flow Diagram – Level 0	22
4.3.2. Data Flow Diagram – Level 1	22
4.4. Summary	23

Chapter 5

Detailed Design of Video summarization - Visual Storyboard using video clips

5.1. Structure Chart	24
5.2. Functional Description of the Modules	25
5.3. Summary	26

Chapter 6

Implementation of Video summarization - Visual Storyboard using video clips

6.1. Programming Language Selection	27
6.2. Platform Selection	27
6.3. Code Conventions	27
6.4. Summary	28

Chapter 7

Software Testing of Video summarization - Visual Storyboard using video clips 29

7.1. Test Environment	29
7.2. Unit Testing	29
7.3. Integration Testing	29
7.4. System Testing	30
7.5. Summary	30

Chapter 8

Experimental Results and Analysis of Video summarization - Visual Storyboard using video clips 31

8.1. Evaluation Metrics	31
8.2. Experimental Dataset	31
8.3. Performance Trend Analysis	33
8.4. Performance Analysis	34
8.5. Image to Storyboard Prompt Analysis	41
8.6. Summary	50

Chapter 9

Conclusion and Future Enhancement 51

9.1. Limitations of the Project	51
9.2. Future Enhancements	51
9.3. Summary	52
